

Workshop Goal and Outcomes

- **Overall goal for the workshop:** exchange information and learning among Hurricane Sandy tidal marsh resiliency related science and restoration projects and coordinate efforts for the next two years towards common outcomes

Workshop Goal and Outcomes

- **Specific intended outcomes include a common understanding and enhanced coordination of:**
 - Where things are happening and should happen;
 - How to relate physical, geological and biological aspects and model marsh and species response;
 - How to characterize relative marsh resiliency across the region;
 - How to consistently assess the effectiveness of marsh restoration
 - How to deliver information
