

Hurricane Sandy Tidal Marsh Resiliency Coordination Workshop

US Fish and Wildlife Service Region 5, Hadley MA

December 10 2015

- **Overall goal for the workshop:** exchange information and learning among Hurricane Sandy tidal marsh resiliency related science and restoration projects and coordinate efforts for the next year towards common outcomes

North Atlantic  Landscape Conservation Cooperative

Workshop Goal and Outcomes

- **Intended outcomes include a common understanding and enhanced coordination of:**
 - What and where data being collected, compiled into maps, and models run
 - Remaining data & mapping needs among cooperators
 - How to consistently assess the effectiveness of marsh restoration/resilience in short and long term
 - Recommendations on science delivery
 - Tidal Marsh lessons learned & true confessions
